Heritage Park and Old Town

### In Tijuana

Visit to glass factory  
Shopping and Old Market  
El Cortijo and Supper  
Fashion Show  
Dinner Dance

## NOTES FROM THE SPECIAL EVENTS COMMITTEE

The uniqueness of this First Mexican-American Congress affords us, the Special Events Committee, the opportunity to plan a memorable First International Social Program that will be very exciting for registrants and accompanying persons on both sides of the border. In San Diego, visits to the World Famous Zoo and Sea World are in the offing, Lunch in Old Town where the histories of Mexico and California began, and of course a visit to the University of California (U.C.S.D.) in the Jewel Town of La Jolla. Best of all are the activities planned for the days in Tijuana, which will please you with its modern and sophisticated comfort and safety. The new and beautiful Hotel Lucerna, site of our activities in Tijuana, is a perfect example of comfort without losing old world Mexican charm. The "Cortijo", a Mexican gentleman's rodeo with Mariachis and Vaqueros (elegant cowboys) is planned; followed by a dinner of 14 of the best regional dishes of Mexico. Transportation will be by quality tour bus, accompanied by bilingual guides.

We look forward to welcoming all of you to an outstanding international event of active scientific and social exchange.

Viva los Estados Unidos! Viva Mexico! Hasta la Vista.

**Committee: Sonja Hamburger, Rosa Elena Huerta, Angelina Ramirez, Edma Talamontes, Ana Patricia Vera**

## COURSE DESCRIPTION

The First Mexican-American Congress of Clinical Immunology and Allergy has been organized to provide an exchange of the latest scientific information of interest and value to practising clinicians and clinical scientists in the USA and Latinamerica. It is also a demonstration program of the feasibility of a joint meeting crossing an international border that has, in the past, been a major impediment to scientific and medical exchange. Outstanding basic and clinical scientists will speak on themes including the Biological Basis of Immunologic Diseases and Allergic Diseases with topics including: Nutrition, the Complement System, T & B Cell Regulation, Tolerance, Genetic Regulation, Transfer Factor, Leukocyte Defects and Tumor Immunology. Clinical scientists will present their studies on asthma, immune deficiency diseases, infectious diseases, allergic rhinitis and immunotherapy.

Contributed abstracts and posters will be selected for presentation and discussion during the Congress.

This Congress is a joint effort of the University of California in San Diego and the Autonoma University in Tijuana with endorsement of both Latinamerican and USA Societies.

## ACCREDITATION

As an organization accredited for Continuing Medical Education, the University of California San Diego School of Medicine certifies that this program meets the criteria of 21 credit hours in Category I for the Physicians Recognition Award of the AMA, CMA, AAP, AAFP.
